

SandwedgeTM

The complete alternative
to the plastic skillet

A patented concept which for the first time allows a board pack to be used for extended shelf life and same day sandwich packaging.

Just some of the advantages:

- High perceived value
- Takes up to approx 14.5% less shelf space than existing products
- Since airtight, sandwiches for same day consumption are preserved saving up to 30% material loss
- Endless possibilities for promotions, coupons, cross-branding etc.
- Available in all sizes to meet customers' requirements
- Ideally suited for branding and other promotions
- Sachets of salt, pepper, mustard, horseradish etc. allow customers different tastes to be easily catered for. Napkins or other products may also be easily and cleanly packaged
- Environmentally friendly using sustainable, fully recyclable materials
- Tamper evident closure
- May be supplied flat packed for manual construction

Sandwedge™

Greener

In its commitment to the environment, Spiral has created a greener sandwich pack than existing products which may be made from fully recyclable and biodegradable materials

Versatile...

Full colour graphics and the window shape may be tailored to suit specific needs with endless possibilities for: promotions, competitions, coupons, cross-branding, product linking and inserts, all without obscuring the sandwich.

SandwedgeTM

... and Flexible.

The Sandwedge is ideal for outlets such as:

Retailers
